

Computerized Dynamic Posturography

Also known as	<div><div></div><div><div>1. Balance Board Testing</div><div>2. Equilibrium Platform Testing (EPT)</div><div>3. Moving Platform Posturography</div></div></div>				
Description	<p>Computerized Dynamic Posturography (CDP) is a test in which the patient, supported by a safety harness, stands on a platform inside a small booth with a visual target to watch. The platform has sensors that measure how well the patient maintains his/her balance when the walls of the booth, the platform, and/or the visual target move. CDP has been used for both diagnosis and treatment of dizziness and balance disorders.</p>
