

Cystometrogram (CMG)

Also known as	<div><div></div><div><div>1. Cystometry</div><div>2. Flow Cystometry</div><div>3. Cystometric analysis</div><div>4. Urodynamic Testing</div></div></div>				
Description	<p>This is a test to evaluate bladder function. One or two catheters are inserted into an emptied bladder through the urethra. One transfers liquid while the other is a pressure sensor. The bladder is then filled with saline and the patient is quizzed on their awareness. The patient will be asked to void and both the flow and pressure recorded. These elements are all plotted together to create the Cystometrogram.</p>
