

Automated, Non-Invasive Nerve Conduction Velocity (NCV) Testing

Also known as	<div><div>1. BREVIO</div><div>2. NC-stat</div><div>3. NCV testing</div><div>4. VT3000</div><div>5. XLTEK NeuroPath</div></div>				
Description	<p>Automated nerve conduction velocity devices are portable, hand-held devices used to conduct nerve testing. NC-stat is one example of such a device. Unlike standard testing, which is individualized to the patient, automated nerve conduction studies test pre-determined body areas and nerves. Proposed uses of automated nerve conduction devices include diagnosing carpal tunnel syndrome and diagnosing peripheral neuropathy, particularly in patients with diabetes.</p>
